## PERMA-PILE SYSTEM

PILECAP, Inc. has developed a superior method, the PERMA-PILE System, to mitigate the on-going challenge of corrosion on steel piling and erosion of concrete piling. The PERMA-PILE System utilizes PILECAP's patented Friction Coupler System with a modified steel jacket made to fit the specifications of any pile shape or length. Each PERMA-PILE System jacket is coated with PILECAP's proprietary PILECOAT spray which provides longevity to the life span of the steel while the steel jacket provides protection of the petrolatum tape from extreme splash zone conditions.

If you have any further questions contact PILECAP Inc. at (913) 948-8340 or visit our website at [www.Pilecapinc.com](http://www.Pilecapinc.com).
